Art Unit: 1651

1. Claims 1-16 are present in this instant application.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3, drawn to a biologically pure culture of *Saccharomyces cerevisiae* strain(s) having certain properties, classified in class 435, subclass 255.2.
 - II. Claims 4-16, drawn to a process for the production of ethanol, classified in class 435, subclass 161.
3. The inventions are distinct, each from the other because the scope of the two Invention I are different. Invention I scope of the microorganism is much broader than that is required to produce ethanol in Invention II.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for one invention is not required for the other invention, thusly the restriction for examination purposes as indicated is proper.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1651

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

8.
